SUMMARY

Aspiring Data Analyst with strong knowledge of SQL, Python, database management, and data analysis concepts. Experienced working with structured data, writing complex SQL queries, and developing database-driven applications. Familiar with data cleaning, data validation, dashboard reporting concepts, and AI/ML fundamentals. Passionate about transforming data into actionable insights and supporting data-driven business decisions

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions

Oracle DBA Trainee

10/2025 – 04/2026

Chennai, Tamil nadu

- Executed SQL queries for **data extraction, data validation, and data analysis** activities.
- Supported database monitoring and maintained **data accuracy, consistency, and integrity** across Oracle environments.
- Worked with Oracle utilities such as **Data Pump (expdp/impdp)** and SQL*Loader for **data migration** and database operations.
- Analyzed database logs and assisted in troubleshooting data-related issues.
- Supported RMAN backup and recovery operations and archive log management.
- Prepared operational documentation and collaborated with teams to resolve database-related incidents.

SKILLS

Data Analysis – SQL, Data Extraction, Data Cleaning, Data Validation, Data Migration, Data Transformation, Data Analysis, Exploratory Data Analysis (EDA), Reporting, Business Insights, Documentation

Soft skills – Analytical Thinking, Problem Solving, Critical Thinking, Attention to Detail, Communication Skills, Team Collaboration, Initiative, Adaptability, Continuous Learning

Programming – Python (Basic Data Analysis & Automation), Core Java, C.

Database – Oracle 19c, MySQL, SQL, Basic PL/SQL.

Tools – Excel, Google Sheets, GitHub.

OS – Linux/Unix Commands, Windows

Manual Testing – SDLC, STLC, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Black Box Testing, Integration Testing, System Testing, User Acceptance Testing (UAT), Test Case Design, Test Scenario Preparation, Defect Life Cycle, Requirement Analysis

Data Visualization & Reporting – Power BI (Basic), Tableau (Basic Familiarity), Dashboard Concepts.

Computer Science Fundamentals – Operating Systems, Computer Networks, Database Management Systems (DBMS), System Architecture Concepts

EDUCATION

Master of Computer Applications (MCA) Master of Computer Applications (MCA)	2026 – 2028 Jaipur, Rajasthan
Bachelor of Computer Applications (BCA) KLS Gogte College of Commerce, Belagavi	2022 – 2025 Belagavi, Karnataka

CERTIFICATES

• Oracle Database 19c Administration Training – Oracle DBA Fundamentals • Linux Administration for Oracle DBA • UI/UX Design Certification – Kalpas Innovations Pvt. Ltd., Hubli	• Oracle Apps DBA Concepts Training – Oracle E-Business Suite Administration • Tata Group – Data Analytics Virtual Job Simulation (Forage) – 2025

PROJECTS

ART HUB Art Marketplace Platform	01/2025 – 06/2025
• Developed a web-based marketplace platform for artists and shopkeepers. • Designed and managed MySQL database structures for application data. • Created SQL queries for data retrieval, validation, and reporting. • Prepared test scenarios and validated core functionalities including user authentication, product listing, cart management, and order processing. • Performed functional testing and verified application workflows across different modules. • Identified and resolved issues during development and testing phases. • Validated backend database records using SQL queries to ensure data accuracy and consistency.	
Customer Churn Analysis & Retention System Technologies: SQL, Python, Excel, Power BI	06/2025 – 10/2025
• Developed a customer churn analysis solution to identify customers at risk of leaving and support retention strategies. • Performed data cleaning, data transformation, and data validation to improve data quality and reliability. • Conducted data extraction and exploratory data analysis (EDA) using SQL and Python. • Utilized Excel for data preparation, filtering, sorting, Pivot Tables, and reporting. • Performed data migration and consolidation from multiple datasets for unified analysis. • Identified customer behavior patterns, churn trends, and key business metrics through analytical reporting. • Created interactive dashboards and KPI-based reports to visualize customer retention performance. • Generated actionable insights and recommendations to support data driven business decisions.
